EDUCATION

King's College London

2025

Masters of Science in Economics and Policy - Distinction

Specialisation: Labour Economics, Public Policy, Causal Inference

Thesis: Ranked 2nd overall among 75 students for best dissertation

University of London (London School of Economics Distance Programme)

2023

Bachelors of Science in Economics - Upper Second Class

Specialisation: International Economics, Mathematical Economics, Industrial Economics

- Top 1 Globally (100/100 grade): Mathematics I
- Top 5 percent of cohort: Mathematical Economics
- Sustainability Advocate Award awarded twice by University of London (Gold Award ; Bronze Award)

RESEARCH EXPERIENCE

Research Assistant, Department of Political Economy & Centre for Sustainable Business

2026

King's College London | Supervisor: Dr Raphael Cunha

- Research assistant on “Corporate Actors in the Global Environmental Regime: Leveraging Big Text-Based Data to Understand Regulatory Uncertainty” (King's Climate & Sustainability Seed Fund), in partnership with Fundação Getulio Vargas, São Paulo.
- Construct a news-text-based Environmental Regime Uncertainty (ERU) index measuring firm exposure to extraterritorial environmental regulation (EU Deforestation Regulation; Brazil and Indonesia), following the Baker–Bloom–Davis methodology.
- Build firm–sector panel datasets in R and support difference-in-differences and event-study analysis linking regulatory uncertainty to exports, filings, and market reactions.

WORKING PAPERS

Does Telework Widen the Abstract-Task Wage Premium?

2025

Master Thesis – 82 percent | [SSRN: 6312638](#)

- Estimate the causal wage premium associated with remote-feasible work in the US labour market using CPS-ORG microdata (2019 to 2023), classifying occupations by telework feasibility with O*NET task data following Dingel and Neiman (2020)
- Implement a difference-in-differences design with two-way fixed effects, finding a wage premium of approximately 2.5 percent concentrated among telework-feasible workers
- Assess robustness to parallel-trends violations using Rambachan and Roth (2023) Honest DiD sensitivity bounds, alongside event-study and placebo specifications

SKILLS

Tools	R (primary), Stata, Python, Qualtrics, AI coding tools (Claude Code, ChatGPT), Github $\LaTeX$
Skills	Large-scale data cleaning and processing ; dataset merging and crosswalk construction ; Reproducible pipelines ; data visualisation ; PLFS, ASI; CPS, ACS, ATUS, O*NET, BLS data handling
Languages	English (Native), Hindi (Native), Marathi (Native), Japanese (B1), Mandarin Chinese (A2)
